

# TRAPSHOOTING

## CHAMPIONSHIPS

『孕龍科技』採用光學定位指向系統所設計的光槍（霰彈長槍），搭載高速攝影機搭配雙核心高速影像辨識晶片，以每 0.0083 秒（每秒 120 次）的速度計算瞄準點，讓光槍更新光標的速度加倍，光槍瞄準更快、射擊更精準，能追擊更小的活動目標物，最高可以支援 4K 螢幕解析度。同時，結合飛靶射擊比賽中的三種奧運指定射擊模式，完美呈現出“不定向飛靶”、“雙不定向飛靶”與“雙定向飛靶”的真實賽程。

# TRAPSHOOTING

## CHAMPIONSHIPS

Our new TRAP SHOOTING game is based on a high-speed, optical positioning system that tracks the exact location and orientation of the shotgun. Using 8 IR markers and recalculating 120 times per second, our shotgun is extremely fast and precise and ensures that the tiniest of movements is accurately mirrored on the screen. Apply this to all 3 Olympic shotgun disciplines – Trap, Double Trap and Skeet – and you are in for a true-to-life shooting experience.

Dimensions:  
2173 x 174 x 2245  
(LxDxH, mm)

Power supply:  
110V/60HZ

**Ultra realistic!**

*Just like being at the shooting range*

### 2 Players Challenge Mode

To find out who is the Best Gun Shooter between both of you

**Consecutive hits yield bonus points!**  
No relaxation as other players may catch up

### New Multiple Shooting Mode

Much More Fun in Shooting Games experience

**High-resolution graphics!**  
55 inch screen
